# Aliso Creek Dental — Veneer Filming List

Oct 16, 2026 · @Creekside Marketing

Everything to capture for the veneer videos. Shoot vertical (phone held upright) and check off each item as it's filmed.

## 1. Doctor talking to camera

Film each line as its own take, looking straight into the lens.

- [ ] "You've seen the shark teeth videos. Let's talk about it."
- [ ] "Those pointy teeth come from aggressive prep. That's not how we do veneers."
- [ ] "A veneer is this thin, so we only remove a thin layer from the front of the tooth. Sometimes none."
- [ ] "Your tooth keeps its shape. No points, no stumps."
- [ ] "Will they look fake? Not if they're designed right. We match your shape and shade."
- [ ] "Do they hurt? Most patients say it's easier than a filling."
- [ ] "Want to know how little prep your smile needs? Book a consult with us."

## 2. Close-ups of the veneer itself

- [ ] Veneer on a gloved fingertip, with light shining through it
- [ ] Veneer next to a ruler or caliper to show how thin it is
- [ ] Full set of veneers laid out on the model before placement

## 3. Veneers being placed (on a patient)

Get as close as possible. Use cheek retractors, and keep blood and needles out of frame.

- [ ] Doctor checking the fit and shade (try-in)
- [ ] Cement going on the back of the veneer
- [ ] Veneer pressed onto the tooth (the most important shot; slow motion if possible)
- [ ] Blue curing light over the tooth
- [ ] Floss going through and excess cement cleaned off
- [ ] Slow pull-back from one tooth to the full finished smile

## 4. Minimal-prep demo on a model

- [ ] Doctor pointing out that only the front of the tooth is worked on
- [ ] A prepped tooth on the model, showing it keeps its natural shape

## 5. Patient before and after

Film these as separate clips. Never put the before and after on one screen.

- [ ] Before: patient's smile, front and side angles
- [ ] Before: patient says in their own words what bothered them about their smile
- [ ] After: patient's new smile in the same lighting and angles
- [ ] After: patient smiling, laughing or turning to camera
- [ ] After: patient says how they feel now
- [ ] Optional: patient looking in a hand mirror for the first time

## 6. Extra footage

- [ ] Outside of the office and signage
- [ ] Front desk and waiting room
- [ ] Doctor showing a patient their smile design on screen
- [ ] 10 seconds of quiet clinic sounds

## Before filming

- [ ] Signed photo and video consent from every patient on camera
- [ ] Doctor approves the lines above (prep amount, pain claim)
